

## House rules for the holiday house Gimle – April 2016

**Welcome to Gimle we hope you will have some memorable days.**

The door opens very easy – But the key is not so accurate this means you must draw the key 1-½ mm back for to easily open the lock.

Start to open for water.

You will find the well for the water 2 m from the road on the left side of entrance to the ground

Closed - both locks is horizontal.

Open – both locks is vertically.

The electricity is always turned on as we now can control a warm air pump from home.

Bring electricity to the water heat - Open to the little shed – and bring the electricity to the box

The warm water box is automatic turned on when you turn on the electricity – That is why you must turn on water before you turn on electricity to the water heater.

Always a bucket under the overflow valve – might be necessary to empty. You can regulate temperature but it is rather hot so normally do not regulate.

If you turn the heating of water too much you can overheat the water box and it is necessary to reset the temperature.

Take off the black screw and press the button. The time is described on the yellow note.

It is best if you use the outdoor shower as much as possible. Do not fill with waste water in tank – **Red is hot blue is cold**

Feel free to use all the things you find in the house.

Wood for the fire is outdoor and can be used. Do not use electric panel or electric heater for heat unless it is accepted.

Turn on electricity to the fridge.

Leave fridge door open when you leave the house

Two quite new mountaine bikes can be used – Keep them locked when you are in the house and you store them in the back of the house at the side with outdoor drying rack and the wood for fire.

Rules for cleaning.

All must be left cleaned.

- Clean all rooms in the house (as you would like to receive it yourself).
- Clean dust / and wipe the windows sill.
- Clean refrigerator "shot of electricity see pictures for turn on" **Leave the refrigerator door open.**
- Vacuum in all rooms.
- Clean bathroom.
- Clean/wash windows if there has been a west wind too long – they can be very salty in a few days and it looks not perfect.
- Dogs allowed.

**Remember to bring:**

*Towels, dishtowel and linens.*

A Bathrobe is perfect to go to the sea and also for outdoor shower.

There are bathrobes in the house that can be used.

**Shopping.**

Small grocery store, morning bread – Købmanden I Hjortdal (2 km).

Small grocery store better selections of goods Dagligbrugs (Small COOP) – Tranum (8km).

**Fjerritslev - 12 km**

Very good and excellent shopping.

Very nice supermarket Superbrugs (COOP). More Discount stores, two bakery, a VERY good butcher, general shopping drugstore clothing and so on.

Please leave book on the holiday house on the table when you leave. And write in our guest book

Wash the windows if necessary. Use a soft broom and very little soap in the water

Swap all the window or more

Flush with lots of cold water until all soap is gone

To leave the beach look for sign E 43.

Instruct this to all in the house especially older children small children should never play at the beach without surveillance.

Bathing at the north sea can be dangerous although the beach at Slettestrand is relatively safe and secure waters.

So always follow the Rules.

If wind and stream is too strong do not enter the water.

Never swim - if a few strokes always along the coast.

Never walk more than 5-10 m into the water.

There is a first sandbank around 20-30 m out but never try to go out there.

So do not swim just jump in the water and get up.

Keep small kids in the hands – The west-coast water is not a playground there can be holes in the ground and a strong under water stream can take you out.

Never bath alone.

Never bath until 1 hour after eating.

Only a fool do not fear the West coast water and treat the rules with disrespect.
